

Truck Racing for the Internet

Dear Sir or Madam,

in order to present Truck Racing to a larger extent to the public we offer you the possibility to download the highlights of each race as a FLV for your website.

Apart from the world-wide TV-presence which we again could increase in the second year of our Truck Racing production, now we also can offer you an extended world wide web presence.

We are only bound to certain details and deadlines which are given to us by the global TV market.

In a first step we put all races from Assen to Le Mans at the disposal, the race in Jarama will follow as soon as there will be no more repetitions of this race on the TV stations. This is done with consideration for the broadcasting TV stations.

The download and the use of the material on your website is free of charge. We only ask you to notify the enclosed list of the used music licenses which are put down as a pdf file under every single race.

Besides we ask you to return the signed license agreement by fax.

This contains that the material will not be pass on to third and will not be used for other promotional purposes than the performance on the Internet on your own website.

Upon receipt of the license agreement, you will receive access to the download.

Best wishes,

Kamiono TV Sport Team
